RESUME OBJECTIVE

I am a Computer Science Engineer with experience in Software and computer skills, looking for opportunities that will utilize my skillset and challenge me to improve. Can take up any role depending on the team situation ranging from a business lead to a technical architect or a developer.

EXPERIENCE & PROJECTS

ACADEMIC ASSISTANT

E-CELL SSTC CLUB / September 2018 - Present

- As a part of E-cell in a Period of 4years I have learn and manage Planning & Research team and documentation team marketing team and at last I am Head of E-cell Student Co-Ordinator.
- Schedule and co-ordinate many Events, appointments, and travel arrangements. Also attended many bootcamps and brainstorming sessions.
- Above than this I have also Experienced in working in Family Business from last 6 years.

LIVE PROJECT

MANAV-SEVA / MADE FOR CHARITY

- Manav-Seva is a non-profitable charity trust run and managed by group of CA's of Chhattisgarh. Our team created a Web-portal/Website to support their noble cause.
- We build this platform for booking of Charity slots by donors and show how they work, We have also placed a customized calendar in it to show the availability of slots.
- Supervised and lead the team of 3 Software Engineers during the development.

College Project

Court Case Management System

- I've got developed a web-based primarily based application to regulate and permit complete registration of all court case which are regarding the court by the domain user therefore registrar, who will register, update, delete, and search case and build report. We can book advocates and many more features like past judgements and many more things are present.

Personal Project

Hunt For Rent

- Hunt for rent is a E-commerce website which allow user to take and give cloths on rental basis. Basically, it's a rental E-commerce website.
